Seddam Tarun Theja

Python Developer | Software Engineer | Data Analyst

Prakasam, Andhra Pradesh, India | +91-7989470772 | siddemtharunteja@gmail.com | linkedin.com/in/seddam-tarun-theja | github.com/Tharunteja9948

PROFESSIONAL SUMMARY

Detail-oriented Computer Science & Engineering undergraduate with hands-on proficiency in Python, SQL, and responsive web technologies. Experienced in designing scalable backend architectures, interactive data analytics dashboards, and relational databases. Demonstrates a strong foundation in Object-Oriented Programming (OOP) and Data Structures & Algorithms (DSA), coupled with verified virtual internship experience in Data Analytics and software engineering. Seeking entry-level Python Developer, Software Engineer, or Data Analyst opportunities to engineer reliable, data-driven software solutions.

TECHNICAL SKILLS

Languages:	Python, SQL, JavaScript (ES6+), HTML5, CSS3
Frameworks & Web:	Django, Bootstrap, Responsive Web Design
Databases:	MySQL (Schema Design, Relational Modeling, Joins, Complex Queries, Indexing)
Data & Analytics:	Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization
Developer Tools:	Git, GitHub, VS Code, Google Colab, Microsoft Excel
Core Competencies:	Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Relational DBMS, Problem Solving

KEY PROJECTS

AI Calls Dashboard & Emergency Incident Analytics | **Python, MySQL, Pandas, Matplotlib, JavaScript, Bootstrap, HTML5, CSS3**

- Engineered an emergency call analytics platform processing incident records across all districts of Andhra Pradesh, categorizing calls into crime, accidents, and medical emergencies.
- Implemented interactive multi-filter dashboards to visualize monthly and yearly distribution metrics and identify district-wise incident hotspots.
- Integrated time-series predictive modeling in Python using historical seasonal trends to forecast next-month emergency call volumes.
- Architected structured MySQL database schemas with optimized indexing to deliver fast query responses for large datasets.

AI-Powered Virtual Interview Platform | **Python, Django, MySQL, JavaScript, Bootstrap, HTML5, CSS3**

- Architected an automated mock interview system allowing candidates to select targeted companies, job roles, and difficulty tiers for practice.
- Engineered browser-level camera and microphone diagnostic checks using JavaScript MediaStreams API to ensure hardware and audio readiness before interviews start.
- Designed an automated question-flow workflow that presents sequential technical questions and evaluates candidate responses with structured scoring criteria.
- Modeled relational MySQL database tables to securely store user authentication, candidate session history, response logs, and evaluation scores.

Leftover Food Recipe Recommendation Engine | **Python, MySQL, Bootstrap, HTML5, CSS3, JavaScript**

- Developed a web application addressing household food waste by dynamically recommending recipes based on user-selected leftover ingredients.
- Implemented an intelligent recipe-matching algorithm that calculates ingredient overlap to deliver ranked recipe suggestions with step-by-step cooking instructions.
- Designed relational MySQL database tables to store ingredients, categories, recipe metadata, and preparation workflows for fast query retrieval.

Interactive Assessment & Quiz Engine | **Python, JavaScript, HTML5, CSS3**

- Built an interactive assessment web app featuring timed question sequences, immediate validation, and automated score computation.

INTERNSHIPS & JOB SIMULATIONS

Software Engineering & Development Simulations — Datacom & Commonwealth Bank (Forage) — **October 2026**

- Datacom: Conducted software reviews, performed root-cause analysis on system defects, and implemented codebase bug fixes.
- Commonwealth Bank: Developed and stylized responsive website components, assessed financial cybersecurity, and drafted hosting proposals.

Python Full Stack Developer Virtual Internship — EduSkills — **June – August 2026 (Grade O: Outstanding)**

- Developed end-to-end web modules connecting responsive frontend interfaces with Python backend services and relational databases.
- Strengthened competencies in Object-Oriented Programming (OOP), modular architecture, and structured database operations.

Data Analytics Job Simulations — Deloitte & Tata Group (Forage) — **April – May 2026**

- Deloitte: Completed practical tasks in enterprise data analysis and forensic technology to support consulting assessments.
- Tata Group: Executed Exploratory Data Analysis (EDA) and financial risk profiling using AI-driven analytics frameworks.

EDUCATION

QIS College of Engineering and Technology, Prakasam — **2023 - 2027**
Bachelor of Technology (B.Tech) - Computer Science and Engineering — **CGPA: 7.33 / 10.0**

Sri Chaitanya Junior College | Intermediate (MPC) — **2021 - 2023** | **Score: 80.5%**

CRR Residential High School | Secondary School Certificate (SSC) — **2021** | **Score: 100%**

CERTIFICATIONS & TRAINING

[+] **Data Analytics with Python** - NPTEL / Swayam (IIT Roorkee · Elite 67%) [+] **Python Programming** - Skill India Digital / Microsoft (40 Hours)

[+] **Front End Web Development** - Skill India Digital / Reliance (240 Hours)
